IDEAL FOR PRE-TREAT SYSTEM

MICROFIBER POCKET MOPS

The IPC Eagle Microfiber Pocket Mop is an 18" innovation. Our innovative pocket mops along with our unique cleaning frames and carts provide the ultimate No-Touch systems to control cross contamination.

True polyester/polyamide microfiber blend cleans better than competitor's "100% polyester" products. The Microfiber Pocket Mop covers more square footage than short pile threads. Available in four colors for color coding systems.

Perfect Webbing for Quick Prep

Heavy duty webbing allows for fast transfer of solution to provide a faster absorption to quickly prep the pre - treat mops.

Hi-Tech Color Blending

White microfiber provides the highest efficiency in extracting soil and is blended into our color coded yarn to provide the best mop in the industry.

Absorbent

Designed to extract and hold the highest amount of soil within the large loop structures. It offers high performance cleaning on all surfaces wet or damp. It is also the ideal mop for the pre - treat system.
