

The rubber is the key

The rubber blade is the most important component of a squeegee, it comes into direct contact with the dirt, cleans and dries the glass.

The unexpensive blades available on the market waste your time because they soon leave unsightly marks all over the glass, they get deformed mainly because of the friction with the surfaces, and because dirt and washing solutions are chemically aggressive.

Cheap blades end up to cost more because they last much less and make your work much less effective.

This is why Pulex TQR (Total Quality Rubber) came about to guarantee a long lasting perfect linearity of the blade's cleaning edge and a perfect adherence to the glass, thus making the window cleaning effective and efficient.

Our blades are made out of real vulcanized natural rubber, a mix with no impurity and a perfect molecular dispersion which guarantees elasticity, snap resilience, hardness, resistance to chemical and atmospheric agents.

THE CUTTING IS MADE BY PRECISION MACHINES AND

THE PERFECTION OF BLADE'S CLEANING

EDGES IS **CHECKED ON 100% OF OUR PRODUCTION.**

.01

HARD RUBBER

- Vulcanized natural rubber
- Better cleaning, better resistance, longer life

CODE	PACK	SIZE
LGMI70015*2	50	15 cm
LGMI70016*2	50	20 cm
LGMI70017*2	50	25 cm
LGMI70018*2	50	30 cm
LGMI70019*2	50	35 cm
LGMI70020*2	50	40 cm
LGMI70021*2	50	45 cm
LGMI70022*2	50	50 cm
LGMI70023*2	50	55 cm
LGMI70024*2	50	60 cm
LGMI70025*2	100	71 cm
LGMI70026*2	50	75 cm
LGMI70027*2	50	80 cm
LGMI70028*2	100	92 cm

.02

SOFT RUBBER

- Vulcanized natural rubber
- It's the softest rubber on the market

CODE	PACK	SIZE
LGMI70015*4	50	15 cm
