

TELEMATIC

YOUR FLEET IN A CLICK

IPC

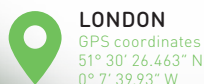

TELEMATIC GPS

The Internet of Things technologies are rapidly developing, thus giving life to a totally new world, where the real, the digital and the virtual converge connecting to each other. The new synergies that Internet is creating can totally transform our way of thinking and living, allowing us to save time and resources opening new opportunities for growth, innovation and increased knowledge.

The benefits can be countless in the cleaning sector through softwares that can connect at anytime and in anyplace with such an integration of information. Facilities will be cleaner, healthier, safer and more sustainable, while productivity and efficiency will increase keeping costs under an improved control. The fleet management systems stemming from IoT technology are giving to cleaning companies the best benefits.

LOCATES YOUR MACHINES, ANYWHERE, ANYTIME

You can keep track by your smartphone tablet and pc: machine position, user ID identification, battery cycles, motor consumption, effective machine use.

LONDON
GPS coordinates
51° 30' 26.463" N
0° 7' 39.93" W

MAIN FEATURES

BATTERY STATUS

(Basic and Full version)
Full Battery Charge Cycle Monitoring.

IDENTIFICATION KEY

(Basic and Full version)
Electronic User Identification key.
Each operator has his own personal account.

MOTOR ABSORPTION

(Only Full version)
Remote control of motor energy absorption and efficiency.

WORKING HOURS

(Basic and Full version)
Full monitoring of machine's actual working hours.
